Discovering Your Narrative Voice — Full 14-Screen Revised Plan

This maps every screen in the module, in order, showing what's on each screen and how it works — not just the five screens flagged in the Content Review Case Study. Screens with no completion barrier or language issue are marked "Unchanged" so the full module structure is visible in one place, rather than only showing the parts that needed fixing.

#	Screen Type	Content / Copy	Interaction & Media Notes	Status
1	Title	"Introduction to Storytelling" / "The building blocks of a story"	Next button advances to Screen 2.	Unchanged
2	Video	Building Blocks video.	Play on demand, Auto play off, Auto progress off. Skip button visible. Prompt: "Watch now, or skip when you're ready."	Revised — built
3	Accordion	Storytelling Elements: Plot, Characters, Setting, Conflict — tap to expand definition. Each expanded item includes a brief audio narration of its definition.	One item expands at a time; others stay collapsed. Audio plays on expand, no forced read order.	Unchanged
4	Accordion	Storytelling Elements cont.: Theme, Point of View, Style, Tone.	Same accordion pattern as Screen 3. No audio on this card — content is chunked across two screens specifically to manage cognitive load, and audio is scoped to the first card only rather than repeated on the continuation.	Unchanged
5	Content card	"Craft Tips" — 3 embedded original tips (show-don't-tell, read dialogue aloud, study a paragraph you admire) replacing the original three outbound links.	No outbound links. All content readable on-screen. Continue button advances.	Revised — proposed (Option B)
6	Title	"Narrative Voice" / "Explore elements of style in writing"	Next button advances to Screen 7.	Unchanged
7	Video	Second video (hand writing at desk).	Same fix as Screen 2: skip button, no lock, reworded prompt.	Revised — proposed
8	Multi-part activity	"Why This Activity" / practice skills list / Voice Switch instructions with an embedded 150-300 word short story excerpt (replacing the external link) / posting instructions.	Swipe-up card reveals sub-sections in sequence. Rewrite task references the on-screen excerpt directly.	Revised — proposed
9	Title	"Style Analysis" / "Your favorite characters"	Next button advances to Screen 10.	Unchanged
10	Video	Style Analysis video lesson (introduces the character-profile activity ahead of Screen 11).	Same fix as Screens 2 and 7: skip button, no lock, reworded prompt.	Revised — proposed
11	Activity instructions	Style Analysis Activity bullets: favorite character, profile in class journal, list characteristics. Revised prompts: "What's a decision they made that they'd take back?" and "Who do they trust, and who do they perform for?" replacing "Do they come from a broken home?" and "What makes them tick?"	Writing happens on paper (notebook/pen), not submitted through the platform. Continue button advances regardless of what was written.	Revised — proposed
12	Accordion	Conclusion: Building Blocks, Narrative Voice, Character Development. Added closing line: "Narrative voice isn't	Same accordion pattern as Screens 3-4. New line	Revised — proposed

#	Screen Type	Content / Copy	Interaction & Media Notes	Status
		just for fiction — it's the same skill you'd use writing a parole letter, a reentry statement, or a message home."	appended to Character Development section.	
13	Open feedback	"How would you improve this lesson?" — free text field.	Optional; no character minimum. Continue button advances regardless of input.	Unchanged
14	Transition	"Wk 3 - The Writing Process" / Next Lesson button.	Advances to the next module in the series.	Unchanged

Notes on Status Labels

"Revised — built" means the change has been made directly in the live LMS and confirmed (currently only Screen 2).
 "Revised — proposed" means the fix is specified and ready to implement but not yet applied in the live module. This distinction matters for portfolio accuracy: the goal is to show real work, not claim more of it is finished than actually is.

Screens 3 and 4 split the eight storytelling elements across two cards rather than one — a deliberate chunking decision, not an oversight, consistent with the cognitive load principles in the Instructional Strategy document. Audio narration is scoped to Screen 3 only rather than repeated on the continuation card.
